Profile

Just do it. Nike's motto adeptly describes my approach to life. I learn by doing and I build things by doing. Work-life balance is a false dichotomy, a lifestyle choice that needs not be made. I work on things that excite me in the depths of my heart; work becomes play, a game that makes life meaningful and interesting.

Data visualization extracts insights from data sets. This is a powerful tool for informing decisions and finding patterns. My canvas is bits and bytes: I execute my designs through front-end frameworks. Perseverance through roadblocks is my forte.

Experience

Product Design Track; Startup Institute; New York, NY   2014-2014
Graduated the Product Design Track at Startup Institute. Startup Institute is an immersive full-time professional career accelerator that helps individuals develop the mindset and skills necessary to successfully launch into a career at a startup.

Frontend Developer/Designer; Equipoise22 LLC; Roslyn, NY   2013-2014
Storyboard, wireframe, and prototype designs for websites
Code the designs into functioning websites with HTML, CSS, JS and jQuery
Work with a backend engineer and share work via GitHub
